RE: Reference for Denver Construction Company

To whom this may concern:

I have been working with Denver Construction Company for over a decade and have completed a dozen projects with an exceptional experience every time. They came highly recommended and have proven their value as a general contractor with diverse and extensive capability.

DCC takes care of my projects so it is hassle-free and worry-free for me. They understand the big picture while being able to take care of the small details. Their knowledge and expertise is demonstrated in the details. Their focus on quality in construction is why they don't miss simple solutions and are able to offer continuous recommendations throughout the process.

Every project we have contracted with DCC has been completed on or ahead of schedule. When anyone at DCC says they are going to do something, it gets done. The diversity of knowledge and skills that DCC's people bring to a project result in always having someone who knows the answer or knows what to do. These are just some of the reasons why we won't go anywhere else for our building needs.

I do a lot of "what if's" when envisioning or planning a new project. DCC gives me the positive and negatives about what can and cannot be done so I get the best end result. The scope, depth and breadth of knowledge that exists at DCC are also impressive. I cannot think of any time where someone didn't know what needed to be done or how to do it better.

I have total confidence in DCC because I can count on them to make every project or property worry free for me, on time and on budget. What truly sets them apart is their service-mindedness including offering the on-call service. I don't consider anyone else their competitor because they have proven that they are the only one to call.

From accuracy of a quote to the communication and attention to details throughout the process of building and renovating, you will be hard pressed to find a company with this level of dedication and commitment to excellence in everything it does.

Sincerely,
